

Russia

Theft Ranking - Has Weapons-Usable Nuclear Materials

Russia ranks 18th in the theft ranking, increasing its score by 2 points from 2014. Russia improved by updating its regulatory requirements for cybersecurity at nuclear facilities. In the future, Russia's nuclear materials security conditions could be improved by requiring more frequent personnel vetting and reporting of suspicious behavior and ensuring its laws and regulations for security of material during transport reflect the latest IAEA nuclear security guidelines. Russia's nuclear materials security conditions remain adversely affected by its high quantities of materials and the large number of sites at which they are located, political instability, governance and corruption challenges, and the presence of groups interested in and capable of illicitly acquiring materials.

	Score / 100	Δ Score	Rank / 24
OVERALL	64	+2	18
Quantities and Sites	23	-	=19
Security and Control Measures	80	+10	12
Global Norms	100	-	=1
Domestic Commitments and Capacity	89	-	18
Risk Environment	14	-4	24

Above Average
